ON-THE-ROAD PRICES

To eliminate uncertainty about hidden costs when buying a new car, Vauxhall publishes on-the-road recommended retail prices (RRP) and these are shown in the pricing tables within this price guide. These prices include the recommended cost of number plates and delivery to a Vauxhall retailer of £700.00 (including £116.67 VAT), 12 months' Government Vehicle Excise Duty (see opposite for details) and the DVLA new vehicle first registration fee of £55.00*.

Please note: The on-the-road recommended retail price (RRP) does not include fuel supplied by the retailer, motor insurance or any other goods or services supplied by agreement between the retailer and the customer.

PRICE PROTECTION

Order a new Vauxhall for build in the current model year (as confirmed by your retailer) for delivery no more than three months in advance and the price you are quoted is the price you pay. This is irrespective of any subsequent price rises between placing your order and delivery of your new car, but you must take delivery as soon as the car is available. General Motors UK Limited is not liable for price adjustments caused by Government changes in the rate of VAT (currently 20%), Vehicle Excise Duty, DVLA new vehicle first registration fee or by any other applicable legislation or regulations.

VEHICLE EXCISE DUTY

The amount of Vehicle Excise Duty (road fund licence) payable on new cars varies depending on the level of carbon dioxide (CO₂) emissions produced by the vehicle. CO₂ emissions are measured in grammes (g) per kilometre (km) travelled and divided into 13 charging bands shown in the table below.

From 1 April 2010 the Government introduced a new 'first year rate' of Vehicle Excise Duty payable on all new cars. In subsequent years the amount of Vehicle Excise Duty payable will revert to the standard rate.

Vehicle Excise Duty*

| | CO ₂ emissions | First year rate | Standard rate |
|---------------|---------------------------|-----------------|---------------|
| Band A | up to 100g/km | £0.00 | £0.00 |

BENEFIT IN KIND COMPANY CAR TAXATION†

The car benefit charge will be the car's list price (including VAT, options and accessories fitted, delivery to retailer and number plates, but excluding Vehicle Excise Duty and new vehicle first registration fee) multiplied by the percentage charge for the CO₂ emissions band in which the car falls (see table opposite). Multiply this figure by your personal income tax rate (20% for Basic Rate, 40% for Higher Rate for 2012-13 tax year) to calculate your annual benefit in kind tax liability.

PLUG-IN CAR GRANT (P-ICG)

Motorists purchasing a qualifying ultra-low emission car can receive a grant of 25 per cent towards the cost of the vehicle, up to a maximum of £5,000. The 2010 Spending Review confirmed that Government has made provision to support the Plug-In Car Grant for the life of this Parliament.

The Government is adopting a 'technology neutral' approach to reducing emissions from transport. This means that cars with tailpipe emissions of 75g/km or less, including electric, plug-in hybrid and hydrogen-fuelled cars are all potentially eligible for the subsidy. However, consumers will find that hydrogen-vehicles are, as yet, less available on the open market than electric and plug-in hybrid options.

To ensure continued value for money for the taxpayer, the scheme, and the level of subsidy provided, will be regularly reviewed. The first review of the Plug-In Car Grant will take place in 2015.

The Plug-In Car Grant has been designed to help make the whole-life costs of a qualifying car more comparable with petrol or diesel equivalents. Over time, as manufacturers begin to make these cars in greater volumes, the costs of production should begin to fall. This will help to make an ultra-low carbon car a realistic option for anyone looking to buy a car.

Both private consumers and businesses can benefit from the Plug-In Car Grant when purchasing a qualifying ultra-low emission car and registering it in the UK.

SMARTER DRIVING TIPS

- **Drive at an appropriate speed:** Staying within the speed limit increases driver safety, reduces CO₂ emissions and saves fuel. At 70mph you could be using up to 9% more fuel than at 60mph and up to 15% more fuel than at 50mph
- **Drive smoothly at all times:** Anticipate the ebb and flow of the traffic to avoid harsh acceleration and braking
- **Reduce your revs:** Change gear earlier to help reduce fuel consumption – try 2500rpm with petrol engines and 2000rpm with diesel
- **Idling is wasting fuel:** If you're likely to be at a standstill for more than three minutes, switch off the engine to save fuel

- **Regularly check your tyre pressures:** Under inflated tyres increase CO₂ emissions whilst incorrectly inflated tyres can be unsafe. Always check your handbook for the correct tyre pressure. This will also help to increase the life of your tyres
- **Remove unnecessary items from the car:** Extra weight increases the engine's workload, whilst roof racks and bike carriers increase wind resistance. All burn more fuel and increase CO₂ emissions
